

Tasks → Code Flutter Group 4

Task 1 :

Write a Dart program that prompts the user to enter 2 integers and prints the sum of all even numbers between these 2 integers (inclusive). Assume that the first integer is always less than or equal to the second integer.

Task 2 :

Write a Dart program that prompts the user to enter integers (0 to stop). The program should count and print the number of positive integers and the number of negative integers.

Task 3 :

Write a Dart program that prompts the user to enter integers (0 to stop). The program should count and print the number and sum of even integers and the number of odd integers.

Task 4 :

Write a Dart program that prompts the user to enter positive integers (0 to stop). The program should count and print the maximum and minimum integers entered by the user.
